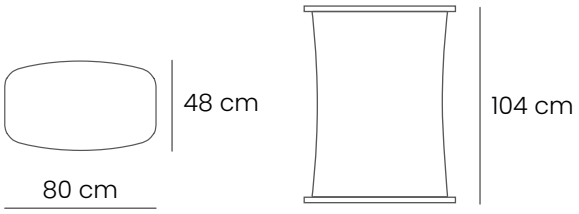
Quick Counter LED

View the video on Youtube



The Quick Counter LED with built-in LED lighting goes from folded in a bag to ready to use in just a few seconds. The gas-spring suspension design allows the counter to rise on its own, making setup extremely easy and fast. When it's time to pack up, it's just as simple – just press the counter together with the graphic panel attached.

The graphic panel is full-color printed and can be easily replaced if needed, providing flexibility for different occasions and messages. The built-in LED lighting provides strong and even illumination, ensuring that the message is seen clearly in any environment.

The counter comes complete in a convenient bag, ready for transport and storage.

The table has a maximum load capacity of 12 kg and is covered by Spennare's limited lifetime warranty.
