

Flextile Illumination kit

100 | 120

The Flextile Illumination Kit is available for frames in 100 cm and 120 cm sizes.

It consists of an illumination panel with thin, parallel LED strips mounted on a flexible material that can easily be rolled up and transported in the included carrying bag.

The illumination panel is mounted on the back of the Flextile frame using a silicone strip.

The kit can also be purchased with a lightbox-compatible graphic panel, which is attached to the front of the frame.

A transformer and connection cable are included in the kit. The Flextile frame is sold separately.

- > **Maximum visibility**
– each frame lights up like a lightbox
- > **Customize the lighting frame by frame**
– no tools needed
- > **The lighting kit integrates seamlessly with Flextile**

Add a lightbox-compatible graphic panel*
– unless you produce it yourself
